SUMMARY

I'm a proficient MERN stack and Flutter developer, specializing in crafting visually striking frontend interfaces and implementing robust backend logic. With expertise in MongoDB, Firebase, Express.js, React.js, and Node.js, I create seamless mobile experiences and REST APIs for diverse platforms. With a passion for user-friendly design, I'm excited to contribute to dynamic development teams

SKILLS

•MongoDB	•Express.js	•React.js	•Node.js	•Flutter	•Dart
•Firebase	•JWT	•Socket.io	•Version control (Git)	•HTML/CSS	•JavaScript
•Redux	•Postman	•Reactstrap	•Bootstrap	•Php	•MySQL

PROJECTS

Flutter

Address Buk (Live Project)

Address Buk, crafted with Flutter and Firebase, is a user-friendly app for discovering and adding local shops. Shop owners can select from various plans for enhanced visibility, while its mobile-optimized design ensures seamless navigation. With real-time updates, Address Buk fosters community engagement and economic growth by simplifying the support for local businesses."

MERN Stack

Chat App

Created a full stack MERN chat app enabling secure one-to-one messaging with JWT for authentication and Socket.io for real-time communication. Implemented a responsive UI with React, integrated MongoDB for data storage, and ensured a smooth user experience with Reactstrap and Bootstrap. Incorporated Redux to streamline state management, improving data flow and scalability.

Flutter

Shopping App

A simple shopping app built using Flutter that displays product data fetched from an API. The app likely includes features such as browsing products, viewing details of each product. It demonstrates the use of Flutter for creating cross-platform mobile applications and integrating external data sources via APIs for dynamic content display.

MERN Stack

Job Portal

Developed a full stack, a user-friendly job portal using MERN stack, helping people find great jobs and companies find the right candidates. Utilized various libraries to make the platform efficient and effective. Implemented features such as advanced search filters, and a responsive design, ensuring a seamless and enjoyable experience for both job seekers and employers on the platform.

Php(Codeigniter)

Connected Care

Connected Care is my final year academic project, built with PHP's CodeIgniter framework. It connects hospitals for effortless patient data sharing and simplifies the process of finding organ donors, promoting a compassionate healthcare community.

Php(Smarty)

E-plan Maker

E-plan Maker, is my academic project, was constructed using PHP's Smarty framework. It offers users the chance to discover impressive architectural designs and create their dream buildings. With its simple interface and abundance of inspiration, it's perfect for sparking creativity.

EDUCATION

2020 - 2023	University Institute of Technology (UIT) Pathanapuram Bachelor of Science. Computer Science	College
2018 - 2020	Government HigherSecondary School,Punalur	Higher Secondary
2013 - 2018	ST.MARY'S HSS kizhakkekara	High School

EXPERIENCE

2023 - Present	MERN + Flutter developer Intern • Experienced MERN + Flutter developer skilled in both front end designing and back end development. Passionate about creating user-friendly interfaces and UI design. Proficient in responsive design, problem-solving, and collaborative teamwork. Actively engaged in code reviews and committed to adopting best practices. Eager to contribute and continuously learn in web development projects.	Softzane Solutions
